**Handchirurgie Abteilung**

Kiseleva Anna Nikolaevna  
Sankt-Petersburg, Russia

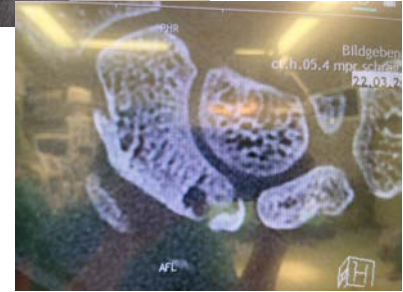

### *Objectives:*

- *Expand my knowledge in hand surgery*
- *Focus on wrist surgery, microsurgery*
- *To learn more about examination and decision making of hand disorders (especially acute child trauma, congenital, infections)*
- *To understand about complications and how to deal with them in order to prevent them*
- *To see different point of view on routine cases*

*Surgical experience: different types of radius osteotomy, swanson prosthesis, 1 stage of flexor tendon reconstruction, replantation, total aponeurotomy, DRUJ procedure (arthrolyse, hemiresection ulna head), tumors, SL reconstruction, wrist arthroscopy, different type procedures for scaphoid non union and e.c.t*

*Every day Hand Surgery in 3 different OP rooms about 4 cases in day.*

*I spent every day of the week in operating theatres, after I went to Ambulance. Twice I stated with surgeon on duty.*

*Every day started (at 07:25 or 06:45) with meeting and showing night cases. I had opportunity to talk about my personality (small presentation).*

*One week we spoke about complications and saw presentation about fingertips injury and ways to heal it without surgery.*

*Every day finished with meeting to discuss about tomorrow OP plan.*

*Also I had opportunity to see hand therapy department (whoooooaa it's amazing!)*

*I saw a place, where W.C.Röntgen discovered x rays!*

*I would like to thank to Prof. Dr. med. Jörg van Schoonhoven who kindly welcomed me.  
The Department of Hand Surgery welcome and opportunity to learn  
I am grateful to FESSH for the financial support*

**To whom it may concern**

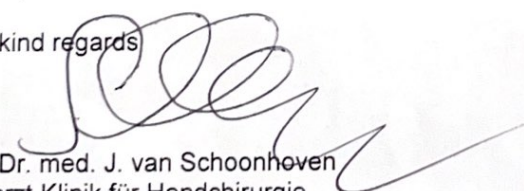

Mrs. Anna Kiseleva has visited the Klinik für Handchirurgie (Centre for Surgery of the Hand) in Bad Neustadt (Germany) full time from May 2<sup>nd</sup> 2023 to May 19<sup>th</sup> 2023.

In our centre surgery of the upper extremity of all kinds including microsurgery, replantation surgery, surgery of the rheumatoid hand and wrist, surgery for congenital deformities of the upper extremity, elbow surgery and surgery for degenerative or post-traumatic deformities is performed. The centre consists of 60 in patient hospital beds for acute patients, 14 beds for rehabilitation of the hand, daily theatre sessions in four operative rooms and a busy out patient clinic treating approximately 20.000 patients per year. In our centre approximately 6.500 operative procedures are performed per year.

During her visit Mrs. Kiseleva has worked full time and daily attended the theatre sessions and the out patient clinic. She was eager to gain special knowledge and insights into the normal and pathological anatomy and biomechanics of the hand and the forearm as well as the diagnostics, etiology and epidemiology, pathogenesis and prognosis of injuries, illnesses and malformations of the hand and the upper extremity.

It was a pleasure to have Mrs. Kiseleva as a visitor during these weeks and I do hope that we will stay in contact.

With kind regards

  
Prof. Dr. med. J. van Schoonhoven  
Chefarzt Klinik für Handchirurgie
